

BACKEND WORK OUTSTANDING

Generated 2026-07-26 · 23 not done · 19 partial · 8 need API confirmation

This brief lists requirements from the Falco system-changes PDF that still need LMS/backend API work, or frontend features that are ready but must be confirmed against live API contracts. Pure frontend-only items already shipped are excluded.

1. Not implemented yet — backend must build

ID	Section	Requirement	Backend notes / API need
L4	Leads	Lead conversion rate and percentage	Summary/KPI endpoint for conversion rate %
L5	Leads	Lead conversion funnel (New / Contacted / ...)	Status model currently new/follow_up/contacted/converted; funnel stages + metrics API needed
L8	Leads	Lead age & stagnation (>48h untouched)	last_touched_at / updated_at query for stale New/Follow Up leads
L9	Leads	Metric cards: Total / Contact / Application / Final conversion	Lead summary KPI endpoint
L10	Leads	Lost/Archived reason required + drop-off chart data	Add lost/archived statuses + required reason codes; counts for chart
C1	Customers	Customer reports by sex, age (18–35 / 35–60), economic activity, region/district	Demographic aggregate report API (fields mostly exist on customer)
C6	Customers	Show/hide map images; Manager/Admin reset & approve location changes	Location change request + approve/reject/reset workflow; permissions for manager/admin
A2	Branch Analytics	Disbursement vs Collection monthly timeline	Branch-scoped monthly funds-out vs funds-in timeseries
A4	Branch Analytics	Target vs Actual matrix for branch KPIs	Branch monthly targets CRUD + actuals comparison API
A5	Branch Analytics	Branch cash flow / vault balance log	Physical/digital vault balance ledger per branch
A6	Application Control	Disbursement bottleneck & TAT report	Time from Approved / Disbursed; aging buckets
A8	Application Control	Pipeline drop-off / abandonment rate	Draft/submitted drop-off funnel metrics
A9	Application Control	Aging badges for pending disbursement >24–48h	Expose approved_at / pending_disbursement_since timestamps
LN1	Active Loans	Fix negative recovery rate inputs	Prefer clear principal_paid / principal_disbursed fields for recovery formula
G1	Groups / Vikundi	Meeting attendance & collection status indicator	Weekly meeting attendance + collection completion flags
G2	Groups / Vikundi	Group risk grading / Group PAR badge	Group-level PAR % / risk grade from member loans
G4	Groups / Vikundi	Center meeting attendance & repayment report	Weekly operational report per group/center
G6	Groups / Vikundi	LO group rotation / productivity leaderboard	Officer group capacity / assignment saturation metrics
P4	Payments	Import ClickPesa + bank statements for reconciliation	Statement upload/parse + match against payments
P5	Payments	Batch reconciliation (multi-select bulk actions)	Bulk approve/reconcile/export selected payments
X1	Additional Modules	Other non-interest income: create, record, report	Full income module (CRUD + reporting)
X2	Additional Modules	Expenses: create, record, reports	Full expenses module (CRUD + reporting)
X3	Additional Modules	Other non-client payment windows: create, record, reports	Non-client payment windows module

BACKEND WORK OUTSTANDING (cont.)

Partial features + confirmation checklist

2. Partially done — backend still required to finish

ID	Section	Requirement	What backend still needs to provide
L3	Leads	Officer ranking: individual vs branch performance	Need aggregates for individual-vs-branch lead ranking
L6	Leads	Officer productivity & sourcing leaderboard	Dedicated lead-sourcing ranking metrics by officer
L7	Leads	Geographical concentration report / map density	Aggregation by ward/region/coordinates density
C4	Customers	ID type not limited to NIDA only	Confirm voter/licence/passport IDs accepted; optional format rules per type
A1	Loan Application	Group application: members with different loan amounts	Confirm per-member applications with group_id + different amounts
A3	Branch Analytics	Officer portfolio leaderboard on branch	Expose branch-scoped officer ranking (clients + repayment rates)
A7	Application Control	Application rejection analytics (reasons)	Structured rejection reasons + counts over time
A10	Application Control	Quick filters: Awaiting Treasury / Ready for Disbursement	If treasury is a distinct state, expose filterable statuses
A11	Application Control	Summary cards: count AND total value	Per-status count + sum(amount) on applications list summary
LN2	Active Loans	Fix epoch / 01 Jan 1970 maturity dates	Null maturity until disbursed OR compute from product terms + start date
LN4	Active Loans	Split outstanding: principal vs interest/fees	Confirm principal_outstanding, interest_outstanding, fees_outstanding always populated
LN6	Active Loans	Expected collections calendar / repayment report	Due-today / this-week / this-month schedule aggregates
LN8	Active Loans	Loan product performance: group vs individual	Product performance broken down by loan_mode group vs individual
G5	Groups / Vikundi	Group vs member exposure matrix	Member share of group total exposure endpoint
R1	Reports	Financial & disbursement reports (full suite)	Disbursed vs principal collected, interest earned, fees by branch
R3	Reports	Loan officer performance reports	Dedicated LO portfolio, collections, new customers report
R4	Reports	Branch comparison reports	Cross-branch customers, volumes, collection efficiency
D1	Disbursement	Management disbursement report pack	Management-facing disbursement report components/API
P1	Payments	All ClickPesa payments reflect (app fees + other income)	Webhook/ledger for registration fees + other income types into LMS

3. Frontend done — please confirm API contract

UI is implemented. Confirm persistence, document types, and response fields on live LMS.

ID	Section	Requirement	Please verify
L1	Leads	Leads report shows gender + staff who added the lead	Confirm API always returns gender + created_by name/role
C3	Customers	Multiple alternative phone numbers (4–5+)	Confirm phone_numbers[] persists and returns on GET
C7	Customers	Guarantor passport photo	Confirm document type guarantor_passport_photo accepted & returned
C8	Customers	Guarantor sex	Confirm guarantor.sex persisted
C9	Customers	Guarantor collateral photos (unlimited)	Confirm guarantor_collateral_photo multi-file append
C10	Customers	Unlimited guarantors	Confirm N guarantors accepted on create/update
C11	Customers	Faster photo loading	Prefer reliable preview_url / thumbnails on all attachment types
G7	Groups / Vikundi	Per-member loan apply with different amounts	Confirm POST /applications with customer_id + group_id

BACKEND WORK OUTSTANDING (cont.)

Suggested delivery waves

4. Suggested delivery waves

Wave	Focus IDs / scope
Wave A — Confirm FE contracts	C3, C4, C7–C11, G7, LN4, A1 — phones, ID types, guarantor docs/sex, member loans, photo preview_url
Wave B — Lead & customer analytics	L3–L10, C1 — conversion KPIs, funnel/lost reasons, stagnation, geo concentration, demographic reports
Wave C — Ops & disbursement SLA	A2–A11, LN1–LN2, LN6, LN8, D1 — branch targets/vault/TAT, maturity, collections calendar, product mode
Wave D — Groups field ops	G1, G2, G4–G6 — attendance, group PAR, exposure, LO capacity
Wave E — Payments & finance modules	P1, P4, P5, X1–X3 — ClickPesa other income, statement import, batch recon, income/expenses/windows

Excluded (frontend already done / FE-only): larger passport UI, location browse/map UI, photo preview loader, loan progress bars, PAR aging UI, reverse payment modal + reason, calculator PDF/Excel export, P/I/F allocation tooltips, etc.
